

MUHAMMAD LUQMAN NUL HAFIZ BIN ABDUL HADI

P13A-06-05, Apartment Sri Cempaka, Tmn Sepakat Indah 2, Sg Chua, Kajang, 43000 Selangor | (+60) 11-1062 3736 | luqmanhafiz247@gmail.com | www.linkedin.com

I am a **Bachelor of Computer Science (Software Engineering) with Honours** graduate from **Universiti Malaysia Pahang Al-Sultan Abdullah** (CGPA 3.05), passionate about **software development** and **AI-driven solutions**. I have hands-on experience with **PHP (Laravel)**, **JavaScript**, **HTML**, **CSS**, **MySQL**, and strong foundations in **Object-Oriented Programming (OOP)**, **UI/UX** design, and **problem-solving**, along with applied experience in **AI technologies** such as speech-to-text **transcription**, **diarization**, and **AI summarization** using tools like **Whisper** and **Ollama**. I am eager to grow as an **AI Developer**, contribute to intelligent system development, and collaborate with teams to build practical, scalable, and impactful software solutions.

EDUCATION

Diploma of Computer Science | Universiti Malaysia Pahang Al-Sultan Abdullah

Diploma obtained in 2021

- CGPA: 3.05

Bachelor of Computer Science (Software Engineering) with Honours | Universiti Malaysia Pahang Al-Sultan Abdullah

Diploma obtained in 2025

- CGPA: 3.05
-

EXPERIENCE

Part-time Technician | AF Computer Central | Balok, Pahang

January 2021 – February 2021

- Recovered data from formatted hard drives on Windows systems.
- Performed system formatting and Windows OS upgrades to maintain optimal performance.
- Upgraded hardware components for PCs and laptops to enhance system capabilities.

Internship Trainee | UMP Advance | Gambang, Pahang

March 2021 – August 2021

- Designed system flowcharts and user interfaces to guide development and improve user experience.
- Developed the “ILMU” E-Learning system using PHP, delivering a functional and interactive platform.
- Maintained and debugged the system to ensure reliability and smooth operation.

Final Year Project | UMPSA | Pekan, Pahang

August 2023 – January 2024

- Prepared Software Requirements Specification (SRS) and Software Design Document (SDD) to guide system development.
- Developed the E-PENGURUSAN JENAZAH KUANTAN system using Laravel, integrating payment gateway and geolocation features.
- Performed system maintenance and bug fixes to ensure optimal performance and reliability.

Internship Trainee | 2en Apps Sdn Bhd | Cyberjaya, Selangor

March 2025 – August 2025

- Collaborated with the Senior Front-End Developer to troubleshoot and resolve system bugs, as well as integrate APIs for the Sistem Pengurusan Maklumat Hartanah (ProMIS) project.
- Assigned to the MyPelantikan project as a Full Stack Developer, contributing to both front-end and back-end development activities.
- Designed and developed the front-end architecture of the MyPelantikan system using Vue.js, focusing on responsive interfaces and improved user experience.
- Engineered and maintained the back-end services of the MyPelantikan system using Laravel RESTful APIs, ensuring efficient data processing and seamless communication between system components.

IT Personnel | 2en Apps Sdn Bhd | Cyberjaya, Selangor

August 2025 – Present

- Developed and deployed the MyPelantikan system, including data migration, configuration, and deployment to ensure smooth production operation.
- Contributed to the SPRM projects (CMS & CRIS) by troubleshooting system bugs, implementing change requests, and improving overall system functionality and stability
- Configured and maintained development and production servers, ensuring seamless integration and reliable communication between CMS and CRIS systems.
- Implemented an AI-powered “Ringkasan Tohmahan” feature within CMS and CRIS, enhancing document summarization capabilities.
- Assigned Served as an AI service developer, working on speech-to-text transcription with diarization, as well as AI summarization and thematic analysis based on transcribed content.

SKILLS

- | | |
|-----------------|-------------------------------------|
| • PHP (Laravel) | • MySQL |
| • JavaScript | • GitHub |
| • HTML | • MVC Architecture |
| • CSS | • Object-Oriented Programming (OOP) |
| • Java | • Flowchart design |
| • Python | • Problem Solving |
| • Ollama | • AI Agent |
| • Whisper | • NumPy |
| • Matplotlib | • Pandas |
